Specific Comments

Draft Data Summary Report NE-1 Ponds

Based on comments from the June 16, 2005 meeting, the discussion was focused on whether additional samples were required at the Ponds. The following resolutions were agreed to:

1. Sampling is adequate for the human health risk assessment.
2. Additional samples are need to assure the public that the sediments left in the ponds are adequately characterized.
3. Samples will be collected at pond inlets and at least one location where the pond is the deepest.
4. DOE will evaluate data and information to determine where the deepest sediment may be.
5. The entire sediment column will be sampled.
6. PCOCs are metals and radionuclides.
7. The actual sampling locations will be based on past sampling locations, pond topography, site walkdowns, and discussions with the regulatory agencies.
8. DOE will provide the regulatory agencies with an IABZSAP Addendum for sampling.

Other Issues

There were no other issues for discussion.
